 - MCWD Pilot Project and County involvement
 - Possibility of Bridgeport pilot
 - June Lake?
- Overall system status
 - Past few month experiences
 - Goals?

TECHNICAL ITEMS:

- GIS Update Process
 - IT taking this over...

MINUTES

MONO COUNTY GIS WORKING GROUP

March 10th, 2004 - 9:00 - 11:30am
Closed Session Board Room - Bridgeport, Ca

Participants: Nate Greenberg Clay Neely Pete Eilertsen
Shane Gleason Greg Newbry

POLICY ITEMS:

REVIEW BUDGET AND EXPENDITURES TO DATE

- Total billed to date: \$23,115
 - Maintenance 17%
 - Meetings 15%
 - 911 Related 25%
 - Data Related 32%
 - Documentation and Training 10%
 - Admin 1%
- Total remaining in contract: \$1,885
- It was decided that work would be put on hold in order to reserve money for emergencies between now and the end of October.

911 ADDRESSING

- It was decided that the effort of merging together the existing 911 Public Works address database to the Tax Role should continue again
 - This was on hold before to determine if there was another method that should be used...
 - It was also noted that addressing is overall a low priority for Public Works right now
- The addressing method (GIS Approach) was discussed and the City of Ontario GIS Addressing Data Model was demoed
 - Address will be stored in three separate locations; (1) Parcel, (2) Structure polygons, (3) Driveway and Front door GPS points
 - Addresses tied to parcels will be maintained on the Tax Role database on the mainframe
 - Using 15 digit
 - Address fields with an extra field for Unit Number
 - APN queries will return all associated addresses
 - Mobile Home APN designation
 - Coding in 15 digit changed a while ago - need to get the new documentation for the changes
 - This documentation will be placed into the Metadata attached to the parcel dataset
- County Fire Chief meeting is Wednesday PM - Nate and Clay are attending and presenting

OTHER DATA ISSUES

- Access to Assessor databases and records is limited and is slowing the workflow for Shane and other County staff members
 - Shane needs access to the Property Characteristics data in order to appropriately assign Solid Waste tax codes to properties
 - These codes are used by Planning and other departments in order to better understand what is on a property, etc.
 - Not having access to this information means that the County is not able to assess a tax on properties for Solid Waste purposes and therefore is losing money!
 - Many areas in Mammoth have yet to be updated, such as the new Village area

- Complete status of this issue is going to be reported to Clay who will inform Dave Wilbrecht regarding the best course of action
- Looking to see if Bob Floyd can give Shane access to his Accella system to look at building's stored information for properties outside of Mammoth

GENERAL

- Address searches are going to be re-evaluated and potentially removed from the ParcelViewer application for the time being, as they are not working very well.
- Thought of putting up an HTML intro screen to the ParcelViewer with a disclaimer, link to the ParcelViewer instructions and information on accuracy and current-ness of the system

TECHNICAL ITEMS:

MAPSERVER UPDATES

- Parcel update ran on 3/9/04
- Next update scheduled for 4/8/04

ASSESSOR MAP TEMPLATE

- Nate will send old template to Pete, but needs some work. Requires some additional funding...

NEXT MEETING: June 9th, 2004 - 9am - 11:30am
Closed Session Room - Board Room, Bridgeport
